Reed Septic Service	Ernie Reed	812 988 7863

This list is meant only as guide and convenience to Cordry/Sweetwater homeowners, and should not be considered a recommendation. A discussion has occurred, with each company, regarding the requirements of the Cordry/Sweetwater Septic Evaluation Committee.

TYPICAL TASKS (This is a guideline only)

Pumping a 1,000 gallon septic tank

Additional charges may apply for larger tanks.

(Prices may vary)

Additional charges may apply for lift pumps.

Locating a septic tank

This is normally accomplished with a ground probe. However, some services may utilize an electronic transmitter which is inserted into the system through a toilet, and transmits a locator signal. The transmitter remains in the tank.

(Additional Charge for the transmitter)

Charge for digging to the tank if no lid or riser

(These charges may vary per Service Company.)

Install a permanent riser and lid on septic tank

Cost is determined by the length of PVC corrugated riser, sealed lid, and will vary depending on per inch of depth. The Evaluation Committee recommends this procedure to control future expense.

Any additional tasks or repairs preformed will be priced separately.
