Quick News

- ✓ We have had (6) winter weather events since the Annual meeting. The total cost of those events is \$12,708.42. This includes material, labor, and equipment usage. 111 labor hours have been spent on these events. 44.5 of those hours were my labor (no additional cost to the District), 52 of the labor hours were overtime hours for Josh Bryant and Kyle Wilborn.
- ✓ We have pre-treated roads (5) times since the Annual meeting. The total cost of pre-treating is approximately \$2,600 with 17.75 labor hours expended (no overtime).
- ✓ Brittany finished the annual report and is currently working on preparing for the annual Water Review. Judy has been hard at it trying to collect water payments and get customers on payment plans. Nick did a great job organizing the septic records and getting out the 2021 notifications. Kaitlyn is nearly finished with scanning in all the past septic records for every system, so it is all electronic.
- ✓ I would like to thank the entire team for going above and beyond for the Freeholders and each other these past three difficult weeks.
